PROFESSIONAL SUMMARY

Full stack developer with hands-on experience building end-to-end web applications, from responsive React interfaces to RESTful APIs and relational databases, using React, Node.js, Express.js, and MySQL. Backed by strong fundamentals in data structures, OOP, and database design, with working familiarity with Docker for containerized environments. Quick learner who thrives in collaborative, code-review-driven engineering teams and is committed to writing clean, efficient, and maintainable code across the entire stack.

TECHNICAL SKILLS

Programming Languages	: Java, JavaScript, Python, C
Frontend Technologies	: HTML5, CSS3, JavaScript (ES6+), React, TailwindCSS
Backend Technologies	: Node.js, Express.js, RESTful API Design
Core CS Concepts	: Data Structures & Algorithms, OOP, Computer Networks, Operating Systems
Database & SQL	: SQL, MySQL, JDBC, Database Design & Query Optimization
Version Control	: Git, GitHub
Tools & DevOps	: VS Code, Microsoft Excel, Antigravity, Docker (fundamentals)
Soft Skills	: Problem Solving, Team Collaboration, Communication Skills

EDUCATION

B.E. in Computer Science Engineering (CSE) HVPM College of Engineering and Technology Sant Gadge Baba Amravati University (SGBAU)	2022 – 2026 Amravati, India
Higher Secondary Certificate (HSC) – Science Vidyabharti Mahavidyalaya, Amravati	Passed: March 2022 Amravati, India
Secondary School Certificate (SSC) Golden Kids High School, Amravati	Passed: March 2020 Amravati, India

PROJECTS

College ERP – Academic Management System Technologies: React (TypeScript), Node.js, Express.js, MySQL, Socket.IO, JWT, TailwindCSS	Jan 2026 – Mar 2026
- Built a full-stack, role-based academic management system for students, faculty, and administrators — architecting both the React (TypeScript) with Vite frontend and the Node.js/Express backend, backed by a MySQL database with connection pooling. - Implemented secure authentication using JWT access tokens and httpOnly refresh-token cookies, with Axios interceptors handling automatic silent token refresh; used bcrypt for password hashing.	

- Engineered real-time data synchronization across all connected clients using Socket.IO, automatically broadcasting database-change events on every mutating request to keep dashboards updated without page reloads.
- Designed end-to-end workflows — UI screens through backend logic — for attendance tracking, fee management, timetable scheduling, and a configurable internal-marks calculator combining assignment, test, and attendance weights.
- Built a polished, animated UI with TailwindCSS, shadcn/ui (Radix primitives), and Framer Motion, and visualized academic data using Recharts.

Personal Portfolio Website

June 2026

Technologies: HTML5, CSS3, JavaScript, GitHub Pages

- Designed and deployed a responsive personal portfolio website showcasing projects, skills, and contact information with cross-browser compatibility.
- Implemented mobile-first responsive design, achieving a 95+ Google Lighthouse performance score; hosted and version-controlled via GitHub Pages.

CERTIFICATIONS

- AI Agents: Cognitive Upgrade and Business Efficiency – AWS Training & Certification | 2026
- AI for Students: Build Your Own Generative AI Model – NxtWave | 2025
- Python for Everybody – University of Michigan (Coursera) | 2024

EXTRACURRICULAR ACTIVITIES

- Member, College Technical Club – participated in hackathons, tech talks, and brainstorming sessions on emerging technologies.
- Volunteered in college code-a-thon event, assisting junior students with web development and version control concepts.
