PROFESSIONAL SUMMARY

Full stack developer with hands-on experience building end-to-end web applications, from responsive React interfaces to RESTful APIs and relational databases, using React, Node.js, Express.js, and MySQL. Backed by strong fundamentals in data structures, OOP, and database design, with working familiarity with Docker for containerized environments. Quick learner who thrives in collaborative, code-review-driven engineering teams and is committed to writing clean, efficient, and maintainable code across the entire stack.

TECHNICAL SKILLS

Programming Languages	: Java, JavaScript, Python, C
Frontend Technologies	: HTML5, CSS3, JavaScript (ES6+), React
Backend Technologies	: Node.js, Express.js, RESTful API Design
Core CS Concepts	: Data Structures & Algorithms, OOP, Computer Networks, Operating Systems
Database & SQL	: SQL, MySQL, Database Design & Query Optimization
Version Control	: Git, GitHub
Tools & DevOps	: VS Code, Microsoft Excel, Antigravity, Docker
Soft Skills	: Problem Solving, Team Collaboration, Communication Skills

EDUCATION

B.E. in Computer Science Engineering (CSE) HVPM College of Engineering and Technology Sant Gadge Baba Amravati University (SGBAU)	Graduated: 2026 Amravati, India
Higher Secondary Certificate (HSC) – Science Vidyabharti Mahavidyalaya	Passed: 2022 Amravati, India
Secondary School Certificate (SSC) Golden Kids High School	Passed: 2020 Amravati, India

PROJECTS

College ERP: Academic Management System

Technologies: React (TypeScript), Node.js, Express.js, MySQL, Socket.IO, JWT, TailwindCSS

- Built a full-stack, role-based academic management system for students, faculty, and administrators — architecting both the React (TypeScript) with Vite frontend and the Node.js/Express backend, backed by a MySQL database with connection pooling.

- Engineered real-time data synchronization across all connected clients using Socket.IO, automatically broadcasting database-change events on every mutating request to keep dashboards updated without page reloads.

NullChat: Real-Time Chat Application

Technologies: React (TypeScript), Vite, Node.js, Express.js, WebSockets

- Built a real-time chat application with a React (TypeScript/Vite) frontend and a Node.js/Express backend, using WebSockets for live bidirectional messaging.
- Structured the codebase as a monorepo with separate client, server, and shared modules for clean separation of concerns.

Finance Tracker: Personal Finance Management App

Technologies: React (TypeScript), Vite, Node.js, Express.js, MySQL, Socket.IO, JWT, TailwindCSS

- Built a full-stack personal finance tracker enabling users to manage income, expenses, and budgets through a real-time, animated dashboard.
- Implemented Socket.IO-based real-time synchronization so transactions and budgets update instantly across all open sessions.

Personal Portfolio Website

Technologies: HTML5, CSS3, JavaScript

- Designed and deployed a responsive personal portfolio website showcasing projects, skills, and contact information with cross-browser compatibility.
- Implemented mobile-first responsive design, achieving a 95+ Google Lighthouse performance score

CERTIFICATIONS

- AI Agents: Cognitive Upgrade and Business Efficiency – AWS Training & Certification | 2026
- Investment Banking Job Simulation – Forage | 2026
- AI for Students: Build Your Own Generative AI Model – NxtWave | 2025

EXTRACURRICULAR ACTIVITIES

- Member, College Technical Club – participated in hackathons, tech talks, and brainstorming sessions on emerging technologies.
- Volunteered in college code-a-thon event, assisting junior students with web development and version control concepts.
